Experiential Learning Activities

“Kadoorie Farm & Botanic Garden”
Experience Activity

Activity Date / Time

26th February, 2024 (Monday)

Object

K3 students

Activity Introduction

In order to extend children's interest in learning about the theme of "Care for the Environment" and the Chinese storybook "The Farm", we have arranged K3 students to go to the Kadoorie Farm & Botanic Garden for an experience activity. Children could understand the appearance, living habits and environment of various animals on the farm.

In addition, children appreciated the shapes, colors and characteristics of different plants on the farm, they developed an attitude of caring for nature and the environment.

Finally, children had a picnic together in a natural environment to experience the fun of outing and practice green living, such as bringing their own food boxes, water bottles, towels, etc., to enhance children's environmental awareness.

Learning Outcomes

- Children can observe the appearance, living habits and living environment of various animals on the farm, and improve their understanding of farm animals.
- Children can learn about various farm facilities and different animals and plants, what can cultivate children's attitude of caring for nature.
- Children can understand the concept of environmental protection in nature, such as: animal excrements can be used as fertilizer for planting.
- Children can personally experience and enjoy the fun of picnics. They can practice green living and strengthen their environmental awareness by bringing their own food boxes, water bottles, sorting and recycling garbage, etc.

Photos

Children observed various animals intently.

Photos

Children appreciated various plants carefully.

Children enjoyed the fun of picnics.

Children took photos with animals.
